

Print attachments from your smartphone, tablet or laptop to the

Ricoh HotSpot Multifunction Printer

Ricoh HotSpot Multifunction Printers (MFPs) make it easy for anyone to print on the go from a tablet, laptop, or smartphone—including BlackBerry® smartphone, iPhone®, and Android®—quickly and conveniently.

The new Ricoh HotSpot multifunction products provide a hard-copy output solution for Internet-enabled device users. HotSpot MFPs enable mobile users to print documents across the Internet, without the need for a device-specific driver or special software.

Ultimate Convenience

- Offer trouble-free printing to mobile workers in corporations, visiting attorneys in law firms, on-site contractors or other guests.
- Get more for your investment. HotSpot MFPs can support everyday network printing requirements in addition to mobile printing needs.

Enhanced Security

- Give access to network printers without giving access to your corporate network.
- Maintain document confidentiality. Only the person who submits the files has access to the prints.
- If not released within 72 hours, documents will be automatically deleted.

Add HotSpot capability to your existing Ricoh MFP!

For a list of HotSpot Supported devices please visit www.ricoh-usa.com/hotspotprinters

It's as easy as forwarding a message.

- 1 Documents, Web pages and email messages/attachments are sent from the Internet-enabled device to a remote server.
- 2 The server generates a printable data file that is formatted for the HotSpot MFP and then transmitted. Release codes are sent directly to the user.
- 3 The print job is received by the target HotSpot MFP option. The file resides safely on the MFP hard disk drive until the user arrives at the MFP and enters the release code.

HotSpot Specifications

Supported Devices: Laptops, PDAs (personal digital assistants), Internet-enabled cell phones or smartphones (such as Apple iPhone®, BlackBerry® smartphone, Droids, etc.)

Methods for use -

- **Web-based Printing:** User types the printer's URL (Web address) into an Internet browser from a laptop/PC.
- **Email-based Printing:** Laptops, PDAs and Internet-enabled cell phones or smartphones can print any email message and/or attachments to the address assigned to the HotSpot MFP.

Supported File Formats: Microsoft Word 2.0>2007, Microsoft Excel 2.0>2007, Microsoft PowerPoint 4.0>2007, Microsoft Visio 5>2007, OpenOffice.org, Adobe PDF, Web pages (htm, html, mhtml), text and TRFT files, JPEG, TIFF, BMP, PNG and GIF.

Supported Languages: English.

Security: TLS authentication is supported for jobs submitted via email. The TLS protocol allows communications privacy over the Internet by allowing client/server applications to communicate in a way that is designed to prevent eavesdropping, tampering or message forgery.

Job Release Code: Each job is automatically assigned a private 4–10 digit release code.

Optional Third-Party Billing Subscription WebPay 2.0: Credit card numbers are transmitted using encrypted secure connections directly to the banking network for authorization and processing.
